

Brazos Transit District

Addendum #2

RFP#: WB852024

Date: 9/9/2024

The purpose of this addendum is to clarify previous question and answer.

1. The type of vacuum drop depends on the type of vacuum and vehicles you want to vacuum. If you are looking for just a regular industrial canister vacuum, like used in self-serve or in-bay automatic wash bays? **Yes, but it needs to include a blower.**

Clarification- air hose to remove small debris and dirt from crevices vacuum hose is unable to reach.
